Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This Office Action is in response to amendment filed October 26, 2005. Claims 1-9 are presented for further examination.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Mondrosch et al. (hereinafter "Mond", US Patent 5,379,031).

As per claim 1, Mond discloses a method for posting a message on a message list accessible to a plurality of processors, said method comprising:

- Selecting a new-message slot (column 5, lines 24-26, 31-38);
- Placing said message in said new-message slot (column 5, lines 33-34, 61-64).
- Modifying said new-message slot to specify an intended recipient of said message, said intended recipient being selected from said plurality of processors (column 5, lines 31-36, 61-64, column 6, lines 30-35).

As per claim 2, Mond discloses the method of claim 1 further comprising inserting said new-message slot into said message list, said message list including a first existing-message slot having a pointer to a second existing-message slot (column 4, lines 20-24; 46-50).

As per claim 3, Mond further discloses the method of claim 2 wherein inserting said new-message slot into said message list comprises setting a first pointer on said new-message slot to point to said first existing-message slot and a second pointer on said new-message slot to point to said second existing message-slot (column 5, lines 40-49).

As per claim 4, Mond discloses the method of claim 3 wherein inserting said new-message slot into said message list further comprises setting said pointer associated with said first existing-message slot to point to said new-message slot (column 6, lines 60-67)

As per claim 5, Mond discloses the method of claim 1 wherein modifying said new-message slot to specify an intended recipient comprises modifying a destination mask associated with said new-message slot, said destination mask including information specifying all intended recipients of said message (column 3, lines 23-30).

As per claim 6, Mond further discloses the method of claim 5 wherein modifying said destination mask comprises

- Selecting, from a plurality of constituent data-elements of said destination mask, each of said constituent data-elements corresponding to one of said processors from said plurality of processors, a selected data-element corresponding to a selected processor (column 3, lines 23-30);
- Modifying said selected data-element to indicate that said selected processor is an intended recipient (column 4, lines 18-25).

As per claim 7, Mond discloses the method of claim 1 further comprising updating a message directory to indicate the presence of said new-message slot in said message list, said message directory being accessible to said plurality of processors (column 6, lines 49-55).

As per claim 8, Mond discloses the method of claim 7 wherein updating said message directory comprises updating an attention mask containing information indicative of which processors from said plurality of processors are intended recipients of messages contained in said message list (column 5, lines 7-17)).

As per claim 9, Mond discloses the method of claim 7 wherein updating said attention mask comprises:

- Selecting from a plurality of constituent data-elements of said attention

mask, each of said constituent data-elements corresponding to one of said processors from said plurality of processors, a selected data-element corresponding to a selected processor (column 4, lines 25-30);

- Modifying said selected data-element to indicate existence of a new message for which said selected processor is an intended recipient (column 4, lines 28-33).

Response to Arguments

Applicant's argument has been considered but is moot in view of the new ground(s) of rejection.
